

DMX-switchable socket

The device is characterized by very small dimensions, making it ideal for retrofitting suitable. The mains-input clamps are duplicated, and therefore several outlets can be looped through. The used relay is oversized with 50A. The contact material is suited for halogen- and capacitive loads. The supply of electronics is generated from the mains, so the connections of the socket are limited to line voltage 230V and DMX512.

Type	built in type
Settings	<ul style="list-style-type: none"> • DMX-adress • threshold
DMX-input	screw terminal up to 1 mm ²
Power supply	230V / 16A screw terminal: <ul style="list-style-type: none"> • flexible up to 2,5 mm² • solid up to 4 mm²
Indicator LEDs	<ul style="list-style-type: none"> • Switching status on the front page • Operating conditions on the back
RoHS-conform	yes
Dimensions	W x D x H 55 x 60 x 100mm
Weight	0,3 kg
Order number	5061
